Brand & Product Profile

01 Company Overview

YUSUN SMART is a true vertically integrated mirror manufacturer headquartered in Zhongshan, Guangdong Province, China — the globally recognized center for premium lighting and home furnishing production. With over 15 years of specialized experience in mirror design, engineering R&D, and production, we serve residential, commercial, hospitality, and entertainment sectors worldwide, delivering high-end, customized mirror solutions that blend cutting-edge technology with minimalist design aesthetics.

As a true factory — not a trading company — YUSUN SMART controls every stage of the manufacturing value chain, from raw mirror glass cutting and silvering through LED module assembly, PCB fabrication, firmware development, surface finishing, and export packaging. This end-to-end ownership delivers consistent quality, competitive ex-factory pricing, and agile response to custom requirements that intermediaries simply cannot match.

Key Facts at a Glance

Founded	2009 · 15+ years of specialized mirror manufacturing
Headquarters	Zhongshan, Guangdong Province, China
Factory Area	10,000 m ² dedicated production facility
Production Lines	5 automated production lines: 2 dedicated LED module lines, 1 smart mirror assembly line, 1 glass processing line, 1 furniture fabrication line
Automation Level	Core process automation rate: 70%+ · Glass cutting and LED soldering are fully automated, ensuring production efficiency and product consistency
Peak Capacity	Monthly peak capacity: 20,000+ units · Capable of fulfilling single orders of 10,000+ units
Annual Output	200,000+ mirror units per year
Export Markets	30+ countries · North America · Europe · Middle East · Southeast Asia · Australia
Certifications	CE · RoHS · FCC · IP44 / IP54 / IP55 / IP67 (by product series)
Proprietary Technology	5 utility model patents · 2 industrial design

	patents · Proprietary LED driver technology delivering 15% lower energy consumption vs industry average
OEM / ODM	Full-service: concept design → tooling → private label → export
Minimum Order Qty	50 units (standard) · 1 unit (custom R&D sample)
Lead Time	15–25 days (stock items) · 30–45 days (OEM/ODM orders)
Warranty	2–5 years depending on product line

02 Core Product Series

YUSUN SMART's portfolio spans four primary categories. Every product line is available in custom dimensions, finishes, control systems, and branding configurations to meet specific project requirements.

2.1 Infinity Mirror Series

Our most visually striking commercial product line. Engineered for immersive environments, the Infinity Mirror series creates the signature "endless depth" tunnel effect through precision one-way mirror optics and addressable RGB LED illumination. Widely adopted in bars, nightclubs, stage performances, hotels, and experiential retail spaces.

Exclusive Advantage: YUSUN SMART's Infinity Mirror series incorporates a proprietary anti-glare LED diffusion layer, resolving the harsh light exposure issue common in standard infinity mirrors. The result is a softer, more immersive visual depth effect that enhances the guest experience in hospitality and entertainment environments.

Abyss Wall Mirror · Endless depth illusion · RGBW addressable LED · Wall-mount French cleat · Any size up to 3000×1500 mm	3D Infinity Dance Floor · Walk-on safety glass · High-load tempered panels · Full-floor LED matrix · DMX512 / MADRIX sync	Tunnel Light Mirror · Corridor & archway forms · Pixel-addressable strips · Chase / pulse / static scenes · Bespoke geometry	RGB LED Art Installation · Custom sculptural forms · 16M color RGBW · Central DMX controller · Exhibition & retail use
---	---	--	--

Technical Specifications — Infinity Series

Light Engine	RGBW addressable LED · SK6812 / WS2812B chipset
Control Protocol	DMX512 · MADRIX compatible · SPI · Bluetooth App · IR remote
Color Output	16 million colors · Chase · Fade · Strobe · Static · Custom scene programming
IP Protection	IP55 standard · IP67 available for floor / outdoor applications
Glass Construction	One-way mirror (front) + standard mirror (back) + sealed LED chamber

Frame Material	Anodised aluminium extrusion · Steel weld frame · Custom timber surround
Custom Sizing	Any dimension up to 3,000 × 1,500 mm · Non-rectangular shapes on request
Installation	Wall-mount · Freestanding · Ceiling-hung cable · Floor-embedded

2.2 Radar Interactive LED Floor Tile Screen

An overhead TOF-LiDAR radar interactive LED floor tile screen that turns any indoor space into an immersive interactive zone. Combining high-density LED beads with ceiling-mounted TOF-LiDAR radar sensing technology, the YUSUN SMART floor tile screen delivers real-time human tracking and responsive visual effects such as water ripple, footprint and dynamic graphic interaction, while the reinforced aluminium cabinet and anti-slip tempered glass provide reliable load-bearing performance for pedestrian traffic. Ideal for exhibition halls, commercial malls, theme parks, event spaces and immersive project OEM partners.

Exclusive Advantage: YUSUN SMART's radar interactive LED floor tile screen adopts external overhead TOF-LiDAR radar, ****no built-in pressure / capacitance sensors inside cabinet****. It supports large-area seamless splicing, low-latency interactive response, and comes with permanent interactive software, readily adaptable for global commercial projects without complex on-site sensor calibration.

Radar Interactive LED Floor Tile - P3.91 pixel pitch- Cabinet size:500×500mm - 3mm anti-slip tempered glass - Aluminium alloy cabinet - Static load ≥2000kg/m²	TOF-LiDAR Radar Sensing - Ceiling-mounted TOF-LiDAR - 10m effective scanning radius - Low latency human tracking - No sensors inside cabinet	Immersive Visual Display - 16bit grey scale - Refresh rate ≥1920Hz - 140° wide viewing angle - 1500 cd/m² brightness	OEM & ODM Customization - Custom size & shape - Custom interactive content - Software customization - CE/FCC certified
--	--	--	--

2.3 Android Smart Mirror

An all-in-one interactive smart mirror that transforms any room into a personal studio. Combining a high-transparency display with AI body-tracking technology, the Smart Mirror delivers live-stream classes, on-demand workout programs, and real-time coaching feedback — all while functioning as a full-length mirror when the screen is off. Ideal for premium gym brands, hotel fitness centres, yoga, beauty, advertising and health & wellness OEM partners.

Exclusive Advantage: YUSUN SMART's Smart Mirror is powered by a proprietary AI algorithm supporting multi-language voice control — including English, Spanish, Arabic, and Mandarin — making it readily adaptable for global market deployment without software re-engineering.

Interactive Workout Mirror · 43" / 55" / 65" sizes · Android OS 11+ · HD camera + mic array · 2 × 20 W speakers	AI Personal Trainer · Pose recognition AI · 17-point skeleton tracking · Real-time rep & form feedback · 1,000+ workout library	Live-Stream Studio Mirror · Low-latency streaming · Multi-user support · Landscape + portrait mount · Instructor-side dashboard	OEM White-Label Platform · Custom Android skin · API for 3rd-party content · OTA firmware updates · CE / FCC certified
---	---	---	--

Technical Specifications — Smart Fitness Mirror

Display	Full HD 1080p / 4K IPS LCD · ≥95% NTSC color gamut
Transparency	100% mirror mode ↔ 100% display mode · Seamlessly switchable
OS & Processor	Android 11 · Octa-core ARM · 4 GB RAM · 64 GB storage
Camera & AI	12 MP wide-angle · AI skeleton tracking · Real-time body pose estimation
Connectivity	Wi-Fi 802.11 ac · Bluetooth 5.0 · HDMI in · USB-A × 2
Audio	2 × 20 W full-range speakers · 6-mic array with echo cancellation
Voice Control	Multi-language support: English · Spanish · Arabic · Mandarin · Expandable
Software	White-label Android skin · Open API for fitness content partners · OTA updates
Power	110–240 V AC · 120–280 W typical consumption (size-dependent)

2.4 LED Bathroom Mirror & Vanity Mirror

Our flagship product line, refined across 15 years of high-volume production. Designed for bathroom environments with strict moisture-resistance and safety requirements, these mirrors combine premium optical glass with intelligent lighting control systems. Available in hundreds of standard configurations and fully customizable in size, shape, and feature set.

Exclusive Advantage: All LED bathroom mirrors use Samsung or Epistar chips with a CRI of greater than 90 (CRI 95 available on premium range), ensuring accurate colour rendering — a critical requirement for makeup application, healthcare, and hospitality environments. Copper-free mirror backing eliminates edge blackening and extends product lifespan beyond industry standard.

Anti-Fog LED Mirror · PTC demister pad · IP44 / IP54 rated · CCT 3000–6500 K · CRI > 90	Bluetooth Audio Mirror · Bluetooth 5.0 speakers · Built-in clock & temp display · USB-A charging port · Touch or IR sensor	Smart Dimming Mirror · Stepless dimming · Memory function · Touch + remote control · Optional motion sensor	Vanity Magnifying Mirror · 5× / 10× magnifier zone · Dual-zone lighting · Wall or freestanding · Nickel / chrome / black finish
--	--	---	---

Technical Specifications — Bathroom & Vanity Mirror

IP Rating	IP44 standard · IP54 available for high-humidity / wet-zone installation
LED Lifespan	> 50,000 hours · Samsung / Epistar LED chips
Color Temperature	Warm White 3000K · Neutral 4000K · Cool 6500K · Tunable CCT
Dimming	Stepless PWM dimming 0–100% · Scene memory function
Glass	5 mm silvered float glass · 1 mm copper-free backing (anti-corrosion)
Power Input	100–240 V AC, 50/60 Hz · Global voltage compatible
Frame Options	Frameless · Aluminium alloy · Solid wood · Powder-coated steel
Control Modes	Capacitive touch · IR sensor · Rocker switch · Wi-Fi / Bluetooth App
Custom Options	Size · Shape · Frame finish · Lighting layout · Logo · Packaging

2.5 Custom Decorative Mirror

Statement Decorative Mirror pieces that place mirror surfaces at their architectural core. Each piece merges the reflective elegance of premium glass with solid structural construction, tailored to meet the exacting standards of high-end residential interiors and hospitality fit-out projects. From luxury mirror cabinets and console tables to bespoke decorative mirror panels, every item is produced to specification.

Exclusive Advantage: YUSUN SMART operates an in-house carpentry and metalwork workshop, enabling genuinely bespoke furniture dimensions, frame profiles, and finish combinations — without the design limitations imposed by off-the-shelf component sourcing. Full project specification drawings are provided at no additional charge.

Mirror Console Table · Tempered glass top · Mirrored acrylic / metal base · Gold / silver / matte black finish · 60–160 cm lengths	Mirror Cabinet · Hinged or sliding door · Integrated LED interior light · Adjustable shelf · Soft-close mechanism	Decorative Mirror Panel · Framed & frameless options · Etched / tinted / antique glass · Feature wall installation · Hotel & retail projects	Vanity Dressing Table · Hollywood bulb ring lighting · Adjustable brightness · Drawer organiser · Foldable triptych design
---	--	---	---

03 Brand Positioning & Core Advantages

YUSUN SMART's mission is to be the most reliable partner in the mirror industry — balancing functionality, aesthetics, and smart living concepts at every price point and scale. Five core differentiators set us apart from competing suppliers:

✔ Full In-House Production From mirror glass cutting and silvering through LED assembly, PCB production, firmware programming, and final QC — every process is owned and operated in-house. No sub-contractors on critical processes. This delivers consistent quality, full defect traceability, and rapid prototyping capability.	✔ Strong Customization Capability We provide end-to-end OEM/ODM services: custom sizes, shapes, lighting effects, control protocols (DMX512, MADRIX, Wi-Fi App), logo printing, and branded packaging. From initial CAD concept to approved pre-production sample in as few as 10 business days.
✔ Strict Quality & Safety Standards All products pass CE, RoHS, and FCC certification requirements. IP ratings from IP44 to IP67 are validated per IEC 60529. Warranty coverage ranges from 2 to 5 years by product line, backed by a dedicated technical support and after-sales team.	✔ Global Project Experience Products exported to 30+ countries, with proven case studies across commercial entertainment venues, 5-star hospitality groups, retail flagship stores, and large residential developer programmes in North America, Europe, the Middle East, and Asia-Pacific.
✔ Proprietary Technology & Patents YUSUN SMART holds 5 utility model patents and 2 industrial design patents. Our proprietary LED driver technology delivers 15% lower energy consumption versus industry average. Exclusive anti-glare diffusion technology and AI fitness algorithms are developed and owned in-house.	✔ Scalable Production Capacity 5 automated production lines with a peak monthly capacity exceeding 20,000 units. Core process automation rate of 70%+ ensures consistent output quality at scale. Capable of fulfilling single batch orders of 10,000+ units with on-time delivery commitment.

3.1 Certifications & Compliance

All YUSUN SMART products are tested and certified for their target markets. We support client-requested third-party testing through accredited labs including SGS, TÜV, Bureau Veritas, and Intertek.

CE	RoHS	FCC	IP44 / IP54	IP55 / IP67	DMX512
CE (Europe)	Covers LVD, EMC, and RoHS directives · Mandatory for EU market entry				
RoHS	Restriction of Hazardous Substances · All product lines compliant				
FCC (USA/Canada)	Electromagnetic compatibility for North American market				
IP44 / IP54	Bathroom-rated ingress protection · Standard across bathroom mirror line				
IP55 / IP67	Dust-tight + high-pressure water jet / full submersion · Infinity floor & outdoor models				
DMX512	Industry-standard lighting control protocol · Entertainment & architectural installations				

Additional Testing	UL, EN standards, and other market-specific certifications available on request · Certification cost to be discussed on a case-by-case basis
3rd-Party Labs	SGS · TÜV · Bureau Veritas · Intertek · Available at buyer's request

3.2 Quality Assurance Framework

Incoming QC	All raw materials inspected on arrival · Supplier certificate of conformance required
In-Process Inspection	Inline QC at glass processing, LED assembly, PCB test, and final assembly stages
Outgoing QC	100% electrical function test · Visual sampling per AQL 2.5 standard
Pre-Shipment Inspection	Third-party PSI available (SGS / Intertek) at buyer's request
Defect Rate Commitment	< 1% for standard production runs · Remediated at zero cost to buyer
After-Sales Response	Quality claims acknowledged within 24 business hours · Replacement parts dispatched within 7 business days

3.3 Selected Project Case Studies

The following case studies illustrate how YUSUN SMART has delivered tailored mirror solutions across diverse industries and project scales. Client identities are presented in general terms to preserve confidentiality.

01
Entertainment

European Chain Bar Group — Infinity Mirror Installation

Product: Custom DMX512-controlled RGBW Abyss Wall Mirror panels (IP55)

Scale: 1,000 m² venue coverage across 3 bar locations; 120+ mirror panels per site

Highlight: Client required mirrors that could synchronize lighting effects with the venue's audio system in real time. YUSUN SMART delivered a custom DMX512 solution pre-programmed with music-reactive scenes, enabling seamless integration with the existing lighting console. Anti-glare diffusion technology ensured visual comfort at high brightness levels, directly enhancing the guest atmosphere and contributing to increased patron dwell time.

"The DMX sync worked perfectly from day one. Lead time and quality both exceeded our expectations."

02
Hospitality

Middle East 5-Star Hotel Group — LED Bathroom Mirror Program

Product: Anti-fog LED bathroom mirrors with IP54 rating, custom frame profile, and hotel logo engraving

Scale: 50 guest rooms per property; 3-property rollout (150 rooms total, 300 units)

Highlight: The client required mirrors that matched the hotel's bespoke interior design language while meeting strict bathroom safety standards. YUSUN SMART developed a custom frameless mirror with an integrated warm-tone LED perimeter, copper-free

backing for humid-climate durability, and discreet logo engraving. Phased delivery was coordinated to align with the property fit-out schedule, with full compliance documentation provided for regional building code requirements.

“Consistent quality across all batches, and the project manager was responsive throughout. We have already placed a repeat order.”

03

Health & Fitness

North American Fitness Equipment Brand — OEM Smart Fitness Mirror

Product: White-label Smart Fitness Mirror (55"), custom Android skin, branded packaging, FCC-certified

Scale: Initial OEM order of 500 units; expanded to 2,000+ units within 12 months

Highlight: The client required a fully white-labeled fitness mirror with a proprietary app interface and FCC certification for the US market. YUSUN SMART provided end-to-end OEM support: industrial design refinement, custom OS skin development, multi-language voice control integration, FCC certification coordination, and Amazon FBA-compliant packaging. OTA update capability was built in to support future software feature releases.

“The OEM process was smooth and professional. The product launched on schedule and has received strong end-consumer reviews.”

04

Retail & Interior Design

Southeast Asian Luxury Retail Developer — Custom Mirror Furniture

Product: Bespoke mirror console tables and decorative mirror wall panels for flagship showroom

Scale: 12 showroom units across 2 properties; fully custom dimensions and gold-leaf frame finish

Highlight: The project required non-standard mirror panel dimensions and a premium gold-leaf decorative frame that matched the developer's brand identity. YUSUN SMART's in-house carpentry and metalwork team produced full specification drawings for client approval prior to production, with two rounds of finish sample review. Final products were delivered in purpose-built wooden export crates with white-glove packaging.

“Exceptional craftsmanship and a collaborative process. The mirrors became a centrepiece of the showroom design.”

04 Partnership & Service

We welcome inquiries about product specifications, customized solutions, project quotations, and long-term cooperation opportunities. Whether you are a distributor seeking a reliable supply partner, a project contractor building a hospitality or entertainment fit-out, or a brand owner looking to launch a private-label mirror product, YUSUN SMART provides tailored support to help your projects succeed.

4.1 OEM / ODM Service Scope

Our OEM/ODM service covers the complete product development lifecycle. A dedicated project manager is assigned from the first inquiry through to final delivery, providing one-to-one communication, CAD drawings and 3D renders for design confirmation, and a maximum 3-business-day revision cycle per round of feedback.

Customization Process & Timeline

Stage	Timeline	Description
Step 1 Requirement Submission	Day 1	Client submits project brief: product category, size, function, quantity, target market, and any reference designs. An NDA can be signed at this stage upon request.
Step 2 Design Proposal	Within 3 business days	Dedicated project manager presents a design proposal with 3D CAD renders and material specifications. Revisions addressed within 3 business days per round.
Step 3 Sample Fabrication	10–15 business days	Pre-production prototype manufactured to approved specifications. Sample includes all functional features, finishes, and packaging as agreed.
Step 4 Sample Confirmation	Client-defined	Sample shipped for client review. Modifications noted and incorporated into a revised sample or confirmed for bulk production depending on scope.
Step 5 Bulk Production	20–30 business days	Mass production commences upon written approval of the PP sample. In-process QC checkpoints apply throughout. Production progress updates provided weekly.
Step 6 QC, Packing & Shipment	3–5 business days	100% electrical test, AQL 2.5 visual inspection, and packing verification completed. Full export documentation issued 3 business days prior to shipment.

- **Private Labelling** Custom logo, branded carton, instruction manuals, and accessory packaging
- **Exclusive Development** IP protection and NDA available for proprietary model development
- **Compliance Support** We assist with certification documentation for your target market, including UL, EN standards, and other market-specific requirements

4.2 Commercial Terms & Delivery

Minimum Order Qty	50 units (standard models) · 100 units (custom finish / OEM) · Negotiable for annual contracts
Lead Time	In-stock: 7–15 days · Standard OEM: 30–45 days from approved PP sample
Shipping Terms	EXW · FOB Guangzhou · CIF to major global ports · DDP available for selected destinations
Payment Terms	T/T 30% deposit + 70% balance before shipment · LC at sight for large orders
Packaging	Double-wall export carton + EPE foam inner · Wooden crate for oversized items · FBA-compliant packaging available
Factory Audit	Welcome — pre-arranged visits supported with facility tour and production demonstration

4.3 After-Sales & Warranty

- **LED Bathroom & Vanity Mirror:** 2-year warranty on LED components; 3-year warranty on glass and frame
- **Infinity Mirror Series:** 2-year warranty on electronic components; frame and glass covered for 3 years
- **Smart Fitness Mirror:** 1-year comprehensive warranty including display, camera, and electronic systems
- **Custom Mirror Furniture:** 2-year structural warranty; surface finish covered for 1 year
- **Technical Support:** Installation guides, wiring diagrams, and video tutorials provided in English and target-market language
- **On-Site Support:** Available for large hospitality and commercial projects (travel costs applicable)

4.4 Who We Work With

Our international client base includes the following partner profiles — each of which receives a dedicated account manager and tailored service package:

Distributors & Wholesalers	Competitive tier pricing, stock programs, catalogues, and co-marketing materials
Project Contractors (B2B)	Technical drawings, compliance documentation, site delivery coordination, and installation support
Brand Partners (OEM/ODM)	Full white-label capability from concept to shelf-ready product
Interior Designers / Specifiers	Sample provision, custom sizing, finish library, and project specification sheets
Hotel & Hospitality Groups	FF&E mirror programs, volume pricing, and phased delivery scheduling
E-Commerce Retailers	Amazon / DTC-ready packaging, barcoding, and FBA-compatible carton sizing

4.5 Logistics & Customs Support

YUSUN SMART provides comprehensive logistics and customs support to ensure a smooth import experience for buyers across all markets. Our experienced export team manages documentation and carrier coordination from factory gate to destination port.

Customs Documentation

A full set of export and customs documents is prepared and issued 3 business days prior to shipment, including:

- Commercial Invoice and Packing List
- Bill of Lading (sea) or Airway Bill (air)
- Certificate of Origin (CO) — FORM A (GSP), China-ASEAN, or standard CO as applicable
- Fumigation Certificate — provided for all wooden packaging and crates
- CE / RoHS / FCC Certification Reports — product-specific, issued upon request
- Material Safety Data Sheets (MSDS) — available for applicable product components

- Additional documents (e.g. insurance certificate, phytosanitary certificate) arranged on request

Freight & Carrier Partners

Sea Freight	Long-term cooperation with Maersk, COSCO, and MSC · FCL and LCL options for all major global ports
Air Freight	Express and general air cargo via DHL, FedEx, and UPS · Recommended for samples and urgent small orders
Courier	DHL / FedEx / UPS door-to-door for samples and small parcels
Incoterms	EXW · FOB Guangzhou · CIF · DDP · Selected by buyer based on project requirements
Transit Time	Sea to Europe: 25–35 days · Sea to USA: 18–28 days · Sea to Middle East: 15–20 days (approximate)
Tracking	Full shipment tracking provided from booking confirmation through port of destination · Dedicated logistics update upon request

Overseas Warehousing & Local Logistics

YUSUN SMART works with bonded warehouse partners in Europe (Rotterdam, Germany) and North America (Los Angeles, New Jersey) to provide flexible inventory solutions for high-volume buyers and distributors. Available services include:

- Short-term bonded storage for pre-positioned stock programs
- Drop-shipping fulfillment to end-customer addresses (B2C capable)
- Local last-mile delivery coordination for project contractors

For markets where we do not currently operate overseas warehouses, our logistics team can assist in connecting buyers with vetted local logistics providers and customs brokers, with full tracking support throughout the transit lifecycle.

05 FAQ — Frequently Asked Questions

The following questions represent the most common inquiries received from international B2B buyers. We encourage prospective partners to reach out directly for any questions not addressed below.

Question	Answer
What is the sample cost, and is it refundable?	Standard product samples are charged at cost price (typically USD 50–300 per unit depending on product type). Sample fees are fully refundable against the first bulk order of 50 units or more. Custom OEM samples are priced based on tooling and fabrication requirements and are non-refundable unless otherwise agreed in writing.

How long does sample delivery take?	Standard samples from existing stock are dispatched within 3–5 business days. Custom or OEM samples require 10–15 business days from design approval. Samples are shipped via DHL or FedEx by default; courier account number can be provided by the buyer to reduce shipping cost.
Are discounts available for large orders?	Yes. Volume pricing tiers are available for orders exceeding 200 units, 500 units, and 1,000 units respectively. Annual purchase agreements with committed volume also qualify for preferential pricing. Please contact our sales team for a customized quotation.
Can the minimum order quantity be negotiated?	The standard MOQ is 50 units for most product lines. For first-time buyers or trial orders, we are open to discussing a reduced MOQ on a case-by-case basis. MOQ for custom finishes and OEM orders is 100 units, which reflects tooling and setup costs.
How are quality defects handled after delivery?	All quality claims must be submitted within 30 days of receipt, with supporting photos or video documentation. Claims are acknowledged within 24 business hours. Depending on the nature of the defect, we will arrange replacement parts, a replacement unit, or a credit note. Return shipments are coordinated and covered by YUSUN SMART for confirmed manufacturing defects.
What certifications can you provide for specific markets?	Current certifications include CE, RoHS, FCC, IP44/IP54/IP55/IP67, and DMX512. Additional market-specific certifications (e.g. UL for the USA, EN standards for Europe, SAA for Australia) can be arranged upon request. Certification costs and timelines are discussed on a per-project basis. We can liaise directly with accredited testing laboratories on the buyer's behalf.
Who bears the cost of additional certifications?	For standard certifications already held by YUSUN SMART, reports are provided at no additional charge. For new market-specific certifications requested by the buyer, the testing and certification fees are borne by the buyer. We will obtain quotations from accredited labs and manage the process on the buyer's behalf.
Can packaging be customized? Is Amazon FBA packaging supported?	Yes to both. We offer fully custom export packaging including branded outer carton, inner foam insert, product label, and instruction manual. Amazon FBA-compliant packaging (correct barcode placement, suffocation warning labels, carton weight and dimension compliance) is a standard option. Please provide your FNSKU or FBA prep requirements at the time of order.
Can you support drop-shipping or direct fulfillment to end customers?	For buyers with established overseas warehouse partnerships or through our bonded warehouse network in Europe and North America, we can arrange drop-shipment to end-customer addresses. Minimum quantities and lead times apply. Please discuss your fulfillment requirements with our logistics team.
Is a factory visit or virtual audit possible?	Yes. Factory visits are welcomed and encouraged for prospective and existing partners. Please contact us at

least 5 business days in advance to arrange the visit and schedule a production demonstration. For buyers unable to travel, a virtual video factory tour and live production walkthrough can be arranged via video call.
